

# catalyse

exponential progress in a time of exponential challenge

circumstance	we can't help the circumstances into which we are born, but others can — this is what civilisation does
realise	abuse comes not from “evil intent” but from how we relate to each other — we can change this (00017, 00020)
unique	everyone is, even if some don't seem so
diverse	a web of cultural practice lifts us over a rocky abyss
accessible	strategy has wings, it flows from person to person

# cherish and thrive

grow, share a cherishing culture

circumstance	societies failing to thrive. continuing to fail, catalyse exponential failure
realise	thrive, grow a nurturing society, a new cultural zeitgeist to lift us all
unique	combination of factors, for example failure in knowledge ( <i>hypocognition</i> 00097), failure in empathy (00013), failure in recall ( <i>motivated misremembering</i> 00045); failure to transmit (00085); Mercier and Sperber (2017, 00074) <i>redefine reason</i> ; Rosenberg (2018, 00089) <i>dismantles narrative and theory of mind</i> ; Mlodinow (2008, 00099) <i>on chance</i> ; collaborate non-zero-sum to <i>grow the pie</i>
diverse	processes flow through <i>environmental filtration</i> (natural selection, Rosenberg 2018) (00093, 00092) prepare for the practically unknowable (e.g. to track what we do not see or know about, we rely on rules of thumb which may not be adequate)
accessible	<a href="#">epub file</a> (screenreader, mobile-friendly) <a href="#">apple pages file</a> (accessible) <a href="#">pdf file</a> (not accessible)

# we can do it

realise we will (00097)
